

Mark,

First, I would like to extend a huge THANK YOU! We were blessed and thrilled to have you here at BMS to speak about life and education to our staff and student's benefit.

Second, I wanted to say, I am appreciative of your passion, knowledge, and communicative skills. Your presentation was engaging, had very smooth transitions, and you spoke with confidence and superior knowledge of the subject.

It was pleasing to listen to the way you spoke about the dangers and safety of cyberspace, while also providing students with tools and strategies to maneuver their social media and cyber space usage. Your direct approach to the dangers of social media and apps was spot on, and exactly what our students needed to be made aware of. They were also educated and informed on how to appropriately use or eliminate dangerous apps. Your attention to detail throughout the presentation was evident, as you provided real life experiences and stories for students to relate to or grasp a better understanding of the importance of being safe. Staff and students alike walked away with a plethora of new knowledge and skills to effectively monitor and use our social media and technology.

Again, on the behalf of myself and the entire campus at BMS, thank you! We look forward to working alongside you again in the future for the betterment of our students and community!

Travis Jake Goode
